UNIBODY

VOTH TRUCK BODIES - UNIBODY DESIGN

- 6" Unibody longsills
- 1" Lower Center of Gravity in comparison to crossmember designs
- Single latch barn door for quick & efficient access to materials.
- Aluminum floor, sides & barn door design provides increased payload capacity without sacrificing quality.

An industry staple since 2003, Voth's signature Unibody is the foundation to this all-aluminum chipper body. With a smooth understructure and low mounting height, Voth's Unibody design is created for heavy-duty service. The low mounting height of this Unibody allows for a lower center of gravity in comparison to traditional crossmember floor design while maintaining the build integrity, stability on the road and on the jobsite. This aluminum dumping chipper body offers an increased payload capacity and fuel efficiency, saving your business time and money on the jobsite.

MANUFACTURING

Voith - Courtland Manufacturing Facility: 92,000 sq. ft

Morden Manufacturing Facility: 56,000 sq. ft

Windsor Manufacturing Facility: 85,000 sq. ft

Voith Truck Bodies serves Canada and the U.S. with steel, aluminum, and hybrid truck bodies. Supporting a variety of industries, Voith has built a strong relationship with the landscape and tree care industries with their unibody dump body design and a range of chipper body and forestry body designs. A member of Drive Products Manufacturing, Voith Truck Bodies are now manufactured in three facilities across Canada. In addition to Voith's signature line of truck bodies, these facilities also manufacture Kargo King Roll-Off Systems, Big Max Roll-Off Systems and more.
